

# JOURNAL OF SOLUTION CHEMISTRY

Volume 16, 1987

*Journal of Solution Chemistry* is a forum for research on the physical chemistry of liquid solutions, covering such fields as physical chemistry, chemical physics, molecular biology, statistical mechanics, biochemistry, and biophysics. The greatest emphasis is on papers in which the solvent plays a dominant rather than incidental role. Most papers deal with experimental investigations of the dielectric, spectroscopic, thermodynamic, transport or relaxation properties of both electrolytes and nonelectrolytes in liquid solutions. Only those studies on pure liquids having bearing on their properties as solvents are considered. Theoretical papers that relate explicitly to measurable solution phenomena and papers describing new or novel apparatus or experimental methods are acceptable. A more detailed description of the editorial policy can be found in the Introductory Statement in the first issue.

Review articles, symposia, book reviews, and a calendar of meetings of interest to the solution chemist may appear from time to time. If the demand warrants it, a section on short communications will be instituted.

## EDITOR

**Robert L. Kay**

Department of Chemistry  
Carnegie-Mellon University  
4400 Fifth Avenue  
Pittsburgh, Pennsylvania 15213

## EDITORIAL BOARD

**Josef Barthel**, Universität Regensburg, Regensburg, West Germany  
**Arthur K. Covington**, The University of Newcastle upon Tyne, England  
**Jacques E. Desnoyers**, Université de Sherbrooke, Québec, Canada  
**Werner Ebeling**, Humboldt-Universität, Berlin, GDR  
**D. F. Evans**, University of Minnesota, Minneapolis, Minnesota  
**Henry S. Frank**, Pomona College, Claremont, California  
**Felix Franks**, University of Cambridge, Cambridge, England  
**Harold Friedman**, State University of New York, Stony Brook, New York  
**Raymond M. Fuoss**, Yale University, New Haven, Connecticut  
**Loren G. Hepler**, University of Alberta, Edmonton, Alberta, Canada  
**H. G. Hertz**, University of Karlsruhe, Karlsruhe, Germany  
**Donald E. Irish**, University of Waterloo, Waterloo, Ontario, Canada  
**George Janz**, Rensselaer Polytechnic Institute, Troy, New York  
**Jean-Claude Justice**, Université de Paris VI, Paris, France  
**S. Lindenbaum**, University of Kansas, Lawrence, Kansas  
**Rufus Lumry**, University of Minnesota, Minneapolis, Minnesota  
**Hiroshi Ohtaki**, Tokyo Institute of Technology, Yokohama, Japan  
**R. H. Stokes**, University of New England, Armidale, Australia  
**Robert H. Wood**, University of Delaware, Newark, Delaware
